

PORCHES

## UNRIVALLED QUALITY

Our experience in working with oak spans over thirty years and we can proudly say that we create the finest hand finished oak porches available. Our meticulous finish is what sets our oak frames apart. We treat each beam with great attention to detail; the kind you won't find anywhere else.

## ENVIRONMENTALLY FRIENDLY

**Perhaps counter-intuitively, oak is in fact a great environmentally-friendly option for home builders:**

### **Renewable resource**

A great renewable resource – it requires no industrial processing and can be used in its raw state, with minimal waste and energy expended.

### **Sustainable supply**

Oakmasters is dedicated to ecological conservation. Our materials come only from sustainably managed sources and we are PEFC Certified.

“MAKE YOUR FRONT  
PORCH PART OF YOUR  
HOME AND IT WILL  
MAKE YOU PART OF  
THE WORLD.”

~ JOHN SARRIS

## WORKING WITH YOU

We have always taken pride in our capacity to work on a fully bespoke basis, bringing to life our customers' dream projects. However, we also recognise that often our clients need suggestions and examples in order to develop their ideas and concepts.

## DESIGN IDEAS

Choose from our range of designs and features, or treat these as a basis on which to develop your own ideas for a bespoke oak porch. We are also happy to work from your architect's drawings.

### Three simple steps:

1. Pick one of our designs or sketch your own ideas
2. Decide on dimensions of your porch using our guide below. Chat to your builder or to us if you are unsure about anything.
3. Call us to discuss your project, send us your sketches and get a quote

Once you are happy with price and design, you can place an order and we will produce a standard CAD detail drawing of the porch confirming the dimensions and relative positioning.

## INSTALLATION

Our oak porches are designed and made as kits and are supplied ready for your local contractor to install. The assembly of an Oakmasters oak porch is a fairly simple procedure, since the components are produced as an integrated kit with all the joints pre-cut and all components marked up for easy assembly. We supply the complete oak frame including oak pegs for self assembly. For other fixings, bricks or tiles, contact your local builders merchant. If your project is more complicated or your contractor needs specialist advice or help, we are more than happy to provide advice and support.
